Final Artwork (Home Page)

This webpage that I designed is the home page screen for my gaming portfolio created by "Akio Gamer." The design features a stylish and dynamic layout with a futuristic theme. It has a prominent title "Gaming Portfolio" and a tagline "Where the presentation begins." The page shows the entry point for viewers to explore my gaming projects and achievements of Akio Gamer, indicated by the "Start Here" button at the bottom.

Final Artwork (Portfolio Page)

My portfolio shows my 6 different things that I did throughout my first semester. Starting from Designing of VR which was submitted on the 1st of Aug, NDP which I will be performing on the 9th of Aug, my codes for the Web which was submitted on Week 10, the designing module which I am doing it now and I have participated in RP orientation as a OPSL this year and in Huawei competition. The background of the page didn't really change much but I change the shuriken like shape. And to proceed to the next page, press the button.

Next Page

This page is the "About Me" section. It provides a brief introduction about me, who is studying Digital Design and Development at Republic Polytechnic. I do share interests in volleyball, coding, and designing. The page also includes a photo of Akio and a "Next Page" button for the last page. And the design at the back of the page, I also changed the shape of the shuriken-like shape.

Final Artwork (Contact Page)

This is my contact page which shows all my different platforms to contact me like my email, phone and Instagram. I also added my location to make sure people know where I am. The shuriken-like shape has also been adjusted a bit and the button shows 'Back Home' to indicate that it is going back to the home page.
